**Subject:** Fenimore Landfill Issue in Ledgewood, NJ

Hi George:

I am working in the Edison REOC and have received 2 calls today through the National Response Center (NRC) regarding odors from the Fenimore Landfill. When we called into the NJDEP to confirm their receipt of the reports, they stated that this is an EPA issue. In researching the issue, I was informed that this landfill was re-opened to handle Hurricane Sandy-related solid wastes and that your branch is working with the State to resolve odor issues associated with the waste management.

As an FYI, I am passing the reports along to you. Could you give me a quick status of this issue so I know what to tell callers about our efforts?

Thanks,

Cris D
